1. Aircraft List

User Story

As an **OPS user**,
I want to browse and search the fleet of aircraft,
So that I can quickly find an aircraft and open its details

Scope

The Aircraft List (**Tổng quan Tàu bay**) provides a centralized view of the aircraft master data, enabling users to:

- Browse all aircraft with summary statistics
- Filter the list by route and status
- Navigate to Aircraft Details

Functional Requirements

✓ Click here to expand...

1.1. Aircraft List

#	Business requirements
1.1.1	Display a list of aircraft managed in the system, from a single unified data source.
1.1.2	Each aircraft record shall display the fields defined in Section 1.2.

1.1.3	Display three summary cards above the list: Active aircraft (Tàu bay đang hoạt động), Inactive aircraft (Tàu bay ngừng hoạt động), Active operating carriers (Hãng khai thác đang hoạt động).
1.1.4	The list shall support pagination.

1.2. Aircraft Info

Each aircraft record shall display the following data.

Data source: aircraft master data - CAT_AC_REGISTRATIONS (CARE), joined to CAT_AIRCRAFT_TYPES (CATY), CAT_AC_CONFIGS (CACC) and CUSTOMERS (CUS)

Field	Label (VIE)	DB column (NCS_PROD)	Rule
AC registration	Tàu bay / Số đăng ký	CAT_AC_REGISTRATIONS.AC_REG	From data source, e.g. VNA865 , VN-B737(8/280)
AC type	Loại	CAT_AIRCRAFT_TYPES.CODE (via CARE.CATY_ID)	From data source, e.g. B737 , A320
Customer code	Mã khách hàng	CUSTOMERS.CUS_NUMBER (via CARE.CUS_ID)	From data source, e.g. VN , QR
Operating carrier	Hãng khai thác	CUSTOMERS.NAME	Full carrier name, e.g. Vietnam Airlines
Configuration	Cấu hình máy bay	CAT_AC_CONFIGS.CACC_NUMBER	Config code from data source
Route	Chặng bay	derived from operated flights	Route(s) operated, e.g.

		(CAT_FLIGHT_INTE RFACES.SECTOR)	SGN - BMV
Last activity	Hoạt động cuối	<i>derived</i> — latest CAT_FLIGHT_INTE RFACES.MODIFY_D ATE / SERVICE_DATE	Timestamp of the most recent operation, shown relative, e.g. 5 phút trước
Status	Trạng thái	<i>derived from</i> CAT_AC_CONFIGS. EFFECTIVE_DATE_ FROM/TO	Active (Hoạt động) / Inactive (Ngừng hoạt động)

1.3. Search & Filter

#	Business requirements
1.3.1	Users can filter within the list by aircraft / customer / AC registration (list filter — distinct from the global search).
1.3.2	Users can filter aircraft by Route (<i>Chặng bay</i>) and Status (<i>Trạng thái</i> - Active / Inactive).
1.3.3	Search is case-insensitive and the list refreshes automatically after a keyword or filter is applied.

1.4. Navigation

#	Business requirements
1.4.1	Selecting an aircraft row (or its arrow) opens the corresponding Aircraft Details page (Section 2).

1.5. Empty State

#	Business requirements
---	-----------------------

1.5.1	If no aircraft match the search / filter criteria, display an empty state message.
1.5.2	For global search: empty input shows no suggestions; no match shows "Không tìm thấy kết quả".

1.6. Out of scope (Phase 1)

#	Business requirements
1.6.1	The "Thêm tàu bay mới" (Add new aircraft) button is out of scope for Phase 1 — aircraft declaration is a later phase.
